

We're passionate about providing you with the best possible health care services

We are always looking at the care we provide, to make sure you're getting high-quality services and that we're using public money in the best way.

This means that we may talk to you about the services you get and how we can work together to make sure you get the right care within the limited resources available to us.

As a practice, we constantly review the prescribing of medication to ensure that our patients get the best and most cost-effective treatment available.

ScriptSwitch is a prescribing tool which assists us to do this. When collecting your medication you may notice changes have been made. Any changes should not affect your treatment.

It is important to understand that we cannot always prescribe everything you want, but we will always prescribe everything that you need.
